

JRRN annual report 2021 (From Apr. 2021 to Mar. 2022)

JRRN: Japan River Restoration Network

Website, Newsletter, News-mail

JRRN operates the website, facebook, YouTube and Instagram to enhance information sharing in Japan. JRRN website provides information on topics related to river restoration in Japan and in other countries, examples of restoration projects, events, books, useful resources etc. In addition, JRRN published "JRRN Newsletter" once per month, and distributed "JRRN News-mail" once a week. (vol. 176 Newsletter, No. 970 Newsmail as of Mar. 2022).

In addition, JRRN operates website and facebook on the collaborative nature restoration along the river since March 2016 to enhance knowledge sharing on this field. This website includes "about collaborative nature restoration along the river", "How to step ahead", "Case examples" and "News & Events" etc. JRRN continues to improve the information sharing infrastructure related to river restoration and contribute to the spread of its technology and knowhow.

International Exchange

JRRN took part in international conference on river management and annual ARRN activities through online for further technical exchange with international experts.

1) Participation in “Water Seoul 2021 ~ Cities for Climate Resilience” online (October 2021, online)

2) Participation in ARRN's “17th International Forum on Waterfront and Watershed Restoration” and “15rd Governing Council Meeting” (November 2021, online)

Research

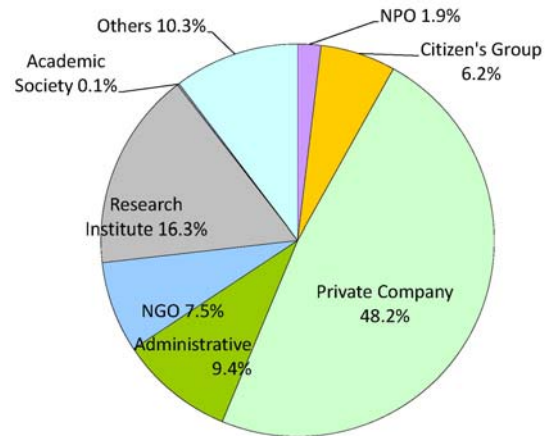

JRRN studied on collaborative nature restoration along river in Japan through partnership approach between river administration and Citizen's group, with experts and JRRN members. (Since 2014)

Publication

JRRN compiled the results of various activities in 2021 as online publication, and promoted efforts to disseminate them through the JRRN website so that they will be widely utilized.

Membership

JRRN consists of about 827 personal and 63 organization members as of March 2022.
